

# Stepping Stones to Endodontic Success

Hamilton, ON

Tuesday, April 20, 2010

with

**Mr. Brian Bevan**

**2 CE CREDITS**

Presented by:

CLINICAL RESEARCH DENTAL  
SUPPLIES & SERVICES INC.

and

## COURSE OUTLINE:

Success rates for endodontic treatment as determined by scientific literature and empirical evidence highly justify conservative root canal therapy, which can ensure a good restorative prognosis. The range of success is determined by several "x" factors, including technological advances, big and small, clinical tips from experienced hands, and a good overall endo-restorative relationship.

This lecture will review several small but clever technical tips, materials and gadgets that have been clinically proven to improve the "endodontic experience".

## EDUCATIONAL OBJECTIVES:

- Identify products and techniques useful for maintaining water tight isolation
- Review immediate and provisional restorative techniques and materials that will maintain an impervious coronal seal
- Learn simple ways of maintaining clarity and visibility in the operating field
- Learn endodontic "tricks of the trade" for access refinement, trouble shooting your apex locator, and finding calcified and MB2 canals
- Review delivery methods and regimens for endodontic irrigation
- Review effective intra-canal treatments
- Learn how to ensure precision air and water delivery during access, irrigation and bonding
- The use of Ultrasonics in endo – will it help my practice?
- Exciting new materials on the endodontic horizon

## WHO SHOULD ATTEND:

Any dentist performing endodontic procedures.

## AGENDA:

Tuesday, April 20, 2010

6:00pm - 6:30pm Registration, light snacks, and refreshments

6:30pm - 8:30pm Lecture

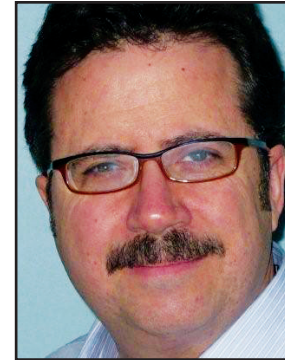

## LOCATION:

Rotsaert Dental Laboratory  
71 Emerald Street South  
Hamilton, ON, L8N 2V4  
(905) 527-1422 or 1-800-263-2113
